

About

The Turner DeMarco Group

Empathy. Experience. Connection. Commitment.

Gail's clients know that her greatest strengths lead to their windfall during real estate decision-making. A #1 ranked agent in El Dorado County with roots in the Bay Area, Gail is known for her creative solutions to real estate's puzzles.

When she partnered with Val Turner in 2018, Gail and the entire market quickly realized how the team's combined expertise puts each of their clients in a position of strength. Through the partnership, the team gained Val's marketing communications expertise and her vast knowledge in Real Estate investment.

For more than a decade before entering real estate sales, Val learned the industry's ins and outs while working as a marketing director and corporate trainer for a West Coast REIT. That experience, combined with her marketing communication degree and incredible instincts, positions Valerie – and her clients – for imminent success.

Her consistently high rankings prove Val's point that the busiest agents are the best agents. She and the members of the Turner DeMarco Group are deeply embedded in the market and well known for achieving creative solutions amid the complexities of real estate sales.

When you start working with Gail + Val, they will be in touch regularly, often answering questions before

you think of them. They give you the reasons for every suggestion they make and devote themselves to ensuring that everyone always knows where things stand. There are no surprises on timeline or on what to expect in the days and weeks to come.

In addition, each member of The Turner DeMarco Group not only has their clients' backs, but they support one another in exceeding every client's needs and expectations. That means that, when working with the Turner DeMarco Group, you have access not only to Gail or Val's knowledge, expertise and connections, but to the resources and knowledge of their entire team.

It means that, when something comes up, you'll receive immediate feedback and sound choices about how to address the decision-making process.
